

Vegetable hair Restructurant Color Erbe ®

Indicated specially for tinted hairs. Protective, nourishing balm for the hair, giving it elasticity, with provitamin A, golden corn and oligoelements (zinc, copper, magnesium, silicon and iron). Provitamin A gives elasticity to the hair, protecting it. The extract of golden corn is rich in sulphurated amino acids (sulphur), essential constituent of the skin and hair. Zinc and copper improve the absorption of vitamins and of other minerals like iron, essential to the hair and skin's well-being. It is particularly advised to use it after application of tint on the hair, since it balances the PH of this one, giving it brightness and volume.
